Detailed Action

Response to Arguments

Applicant's arguments, filed 9/12/2008, with respect to the Obvious type double patenting have been fully considered and are persuasive. The double patenting rejections of the claims have been withdrawn. While the examiner does not agree with applicant's argument that the claims were patentably distinct as they appeared at the time of the rejection subsequent amendments by applicant of the claims of the instant action have resolved the double patenting issue.

Applicant's arguments with respect to the 102/103 rejections have been persuasive as well. With the amendment of the claims the applicant has successfully defined the scope of the claims above that of the art. The 102/103 rejections of the claims have been removed.

Reasons for Allowance

Claims 1-11 are allowed.

The following is an examiner's statement of reasons for allowance:

As to Claims 1 & 11, the prior art of record, taken alone or in combination, fails to disclose or render obvious the anisotropic amplifying medium being used to control the intensity of the counter propagating optical modes so as to bring the output modes to the same intensity level, in combination with the rest of the limitations of the claim. While in the art the examiner can find the control of counter propagating optical modes to bring them to the same level the examiner cannot find one that uses an anisotropic amplifying medium to do so.
